PROFILE SUMMARY

I'm a **Software Developer with 3+ years of experience**, building cross-platform mobile and web apps using **Flutter**. I have strong expertise in Flutter, Dart and iOS, with hands-on experience in developing high quality apps with optimised **performance**. I specialise in building scalable, user-friendly applications with efficient state management and great **user experience**.

SKILLS

- Flutter
- Dart
- iOS (SwiftUI)
- Android (Compose)
- Riverpod, BloC, GetX
- Firebase API Integration
- Drift SQL / SQLite
- PostgreSQL
- Antigravity & ClaudeCode
- App Deployment using Google Play Store, Apple AppStore and MDM
- Clean Architecture, MVM, MVVM, SOLID Principles, Google Cloud Platform, ClaudeCode, MCP Servers
- Git, Gitlab and Bitbucket

PROFESSIONAL EXPERIENCE

Software Developer

Sep 2025 - Present

Network People Services Technology, Bengaluru. (**FINTECH** Domain)

- Developing and maintaining mobile banking features for **Canara Ai1** applications, serving **80M+** active users with high performance and reliability.
- Designed and enhanced core deposit modules, including Credit & Debit Card and User Onboarding.
- Handled API securely and configured **NPCI UPI** integration on **Canara Ai1 App**.
- Contributed to secure payment features including **SSL Pinning**, **Device Binding**, Mobile Banking Payments, and **UPI integration**, improving transaction security and reliability.

Mobile Application Developer

Aug 2023 - Sep 2025

Thiran Technologies , Chennai.

- Developed offline capabilities for the **T-EAM product**, handling user transactions with local and cloud databases that reduced the application size by **40%**.
- Functional knowledge of IBM Maximo to enhance mobile application implementation.
- Successfully deployed **5+ Apps** on both Google Play Store and Apple AppStore for Thiran Technology.

Mobile Application Developer Intern (8 months)

Jan 2023 - Aug 2023

Doodleblue Innovations, Chennai.

- Learned iOS (SwiftUI) while working on **CDONE**, a laundry management system similar to a **delivery app** created on Flutter Framework.
- Contributed to **Ausper Gold**, an **iOS-native** app built with **SwiftUI**, integrating a YouTube video section with dynamic scrolling for showcasing Ausper Gold shop videos.

EDUCATION

Master of Computer Applications (Gold Medalist)

S.A. Engineering College, Chennai.

CGPA : 9.1

Nov 2021 - April 2023

Bachelor of Computer Applications

K.C.S College of Arts and Science

CGPA : 7.9

July 2018 - April 2021

PROJECTS

Canara Ai1 Mobile Application:

- Developed and enhanced multiple digital banking modules including Fixed Deposit, Recurring Deposit, Goal-Based RD, Tax Saver Deposit, **NPCI UPI Integration**, PPF, SSY, Debit & **Credit Card Services**, Nominee Maintenance, and Transaction Dispute Management.
- Implemented secure **Fintech** integrations including **SSL pinning**, device binding, and secure **API communication** and **UPI transactions**.
- Contributed to a mobile banking platform serving **80+ million customers**, focusing on feature delivery, application stability, and seamless user experience.

Itineery AI: Trip Planner

- Built an **AI-powered travel planning app** in Flutter using Clean Architecture, **BLoC**, GetIt, and GoRouter, with features for authentication, trip planning, timelines, and profile management.
- Engineered a hybrid itinerary pipeline using Gemini (Vertex AI) with **OpenTripMap**, **Wikipedia**, **Google Places**, and weather services to generate optimized day-by-day travel plans.
- Implemented **offline-first** and monetization features using Hive, pre-downloaded itinerary bundles, Firebase Remote Config, **AdMob**, and **RevenueCat** to improve reliability and support subscriptions and ad revenue.

T-EAM Work Execution Application:

- Built a Flutter mobile application with Riverpod state management, a **Feature Flagging** and seamless
- **IBM Maximo API integration** for efficient data operations.
- Implemented **offline data synchronization** using the Drift database and achieved **high-performance**
- Implemented a **Transaction Queuing System** to track user actions offline, ensuring all actionable data syncs to the backend once the user **reconnects to the internet**.
- Achieved the data downloading of **1 million records in just 2 minutes** through **parallel API calls** rather than using the old sequential API calling method.
- Added an in-built **AI Chat Bot** for the T-EAM product, increasing product sales by **20%**.

T-EAM Inventory Application:

- Added support of dynamic **Feature Flagging**, and seamless **IBM Maximo API integration** for efficient inventory operations including all the GET/POST API's.
- Accomplished an **Auto Download Attachment** feature, enabling automatic **background downloads** of all attachments upon user login.

959@FM Service Request Application:

- Worked on **959@FM**, a facilities management service app for KAUST, enabling users to **book, track, and manage facility services**
- Integrated **offline capabilities**, ensuring requests **sync** when back **online**.
- Developed real-time request tracking and **push notifications** for service updates.
- Added a **custom feedback mechanism** for getting user feedback on service request completion.

Cognitive Dashboard Web Application:

- A Flutter based **Web App** which works similar to Google Maps with real-time latitude and longitude integration and its specifically for a client.
- Accomplished a **seamless UI, smooth animations**, and real-time data fetching from interactive markers without requiring a page reload using the firebase firestore streams.
- Engineered a status calculation system using a **data matrix for in-depth insights** with **secure web routing**, and **ensured data security** through robust security measures.

Other Activites

- **Community Engagement:** Volunteering on Namma Flutter Chennai, FFDG, GDG, JSLovers and Chennai React.
- **Technical Interviewing:** Conducting **L1 technical interviews** for freshers for the 7 months during my working period on Thiran Technologies.
- **Mentorship:** Guiding and **mentoring juniors** to improve their daily work, especially in **Flutter** app development.
